

Integration of figures

The Integration of figures into a page is straightforward, and Figure 1) shows an example. However, note that figures first have been uploaded via the Media Manager.

Figure 1: EM Image of *A. baumannii*

****media integration is straightforward**** (Figure `{{ref>AB}}`).

```
<figure AB>
{{:pbio_basics:images:abaumannii.png?200|}}
<caption>
EM Image of //A. baumannii//
</caption>
</figure>
```

You can then refer to the figure at any position on the page by referencing the figure name. Figures will then be automatically numbered.

The Integration of figures into a page is straightforward, and Figure `{{ref>AB}}` shows an example

Embedding figures in boxes

Sometimes it is nicer to embed a figure into a box. You can use the WRAP plugin for this. Figure 2 gives an example.

Figure 2: EM Image of *A. baumannii*

```
<WRAP round box 200px>  
<figure AB2>  
{{:pbioic_basics:images:abaumannii.png?200|}}  
<caption>  
EM Image of //A. baumannii//  
</caption>  
</figure>  
</WRAP>
```
