

Further Features

DokuWikis have a couple of advantages over traditional paper-based documentations of your work. These are, among others

1. **The DokuWiki is easy to use**
2. **Exhaustive documentation** is possible via copy and paste
3. **Broad range of text formatting options**
4. **Extendable via [Plugins](#)**
5. **Subordinate information can be hidden**

```
<hidden WikiCode>
Display some information only when the user clicks on the words
WikiCode
</hidden>
```

6. Numbered lists can

1. help
2. you
3. to
4. structure
5. things

See [HERE](#) if your numbering breaks due to intervening images, code, and the like.

6. exhaustively

```
- Numbered lists can<WRAP>
- help
- you
- structure
- things<WRAP>
<hidden HowToContinueNumbering>
See
[[general:dokuwiki:wiki_issues#How_to_continue_a_numbered_list|HERE]]
if your numbering breaks due to intervening images, code, and the like.
</hidden>
</WRAP>
- exhaustively
```

7. **[Text formatting](#) enhances the information transfer**

```
<color blue>Text formatting</color>
```

The use of

```
<color>...</color>
```

requires the plugin [color](#)

1. Text can be **bold face**, *italics*, **bold face italics**

```
Text can be bold face, //italics//, bold face italics
```

8. Entire code blocks (relevant for bioinformaticians) can be integrated via copy and paste

forloop.sh

```
for i in `ls`; do echo $i; done
```

```
<file bash forloop.sh>
for i in `ls`; do echo $i; done
</file>
```

9. cross-linking of information via [internal links](#) and [external links](#) is simple

```
cross-linking of information via \[:pbioc\_basics|internal links\] and http://www.dokuwiki.org|external links is simple
```

- 10. **organize and re-organize information using section headings, pages, and links**
- 11. The **Media Manager** makes the integration of all kinds of media straightforward.
- 12. **Information sharing among members of a working group is simple**
- 13. [Revisions](#) allow to move back to older versions of the WIKI
- 14. **Change history allows to monitor who changed when a particular page (see bottom right of the page)**
- 15. **Backups increase data security**
- 16. Task assignment using the [do plugin](#) in combination with the [sqlite plugin](#)

☐ Retire (Assigned to ingo. Due on 2035-05-30)

```
<do 2035-05-30 ingo>Retire</do>
```

17. Generating a list of tasks assigned to you
No tasks found

```
{{dolist>:?id=general:computerenvironment:tasksetwiki&status=UNDONE&limit=10&user=ingo}}
```

18. Issuing a poll

What do you like best?			
Real name	Option 1	Option 2 some wikimarkup is allowed!	Option 3
Warning: Undefined array key "editLinks" in /var/www/html/teaching/wiki/lib/plugins/doodle4/doodle_template.php on line 52 Aasiyah Atchia (aasiyah)	✔		

Warning: Undefined array key "editLinks" in /var/www/html/teaching/wiki/lib/plugins/doodle4/doodle_template.php on line 52 Elena Rao (elena)	✔					
Warning: Undefined array key "editLinks" in /var/www/html/teaching/wiki/lib/plugins/doodle4/doodle_template.php on line 52 Yannick Scheier (yscheier)	✔				Count: 3 0 0	

Requirement: [doodle4 plugin](#)

```
<doodle
  title="What do you like best?"
  auth="none|ip|user"
  adminUsers="user1|user2"
  adminGroups="group1|group2"
  voteType="single|multi"
  fieldwidth="auto|123px"
  closed="true|false"
  showMode="all|own"
  showSum="true|false"
  userList="vertical|horizontal"
  printname="both|fullname|username"
>
  * Option 1
  * Option 2 **some wikimarkup** \\ is __allowed__!
  * Option 3
</doodle>
```

19. Placing text with an indent

This is the indented Text

```
Placing text with an indent<WRAP>
<wrap indent>This is the indented Text</wrap>
</WRAP>
```

20. WRAP options

Obviously, we can show here only a small set of the things that can be done with a DokuWiki. For a more comprehensive overview of the wiki syntax follow this [LINK](#). Feel also free to search the available [plugins](#) for further inspirations of how to extend the functionality of a [dokuwiki](#).
