

Links

Once you have spread information across different pages (and probably also across the internet), a creative use of [Links](#) can make your DokuWiki a comprehensive knowledge base. We distinguish internal links, i.e. links to pages within the same DokuWiki and external links to any website. See some examples below:

- [internal link to a page](#)

```
[[general:computerenvironment|internal link to a page]]
```

- [internal link to a section within the same or a different page](#)

```
[[[:general:computerenvironment:tasksetwiki#headings|internal link to a section within the same or a different page]]
```

- [external link](#)

```
[[http://www.uni-frankfurt.de|external link]]
```

- [🌐 interwiki link](#) (link to the Wikipedia article about *Acinetobacter baumannii*)

```
[[wp>Acinetobacter_baumannii|interwiki link]]
```
